

ANRF-PAIR PROJECT

UNIVERSITY OF HYDERABAD

PROGRESS REPORT

1. GENERAL INFORMATION

WORK PACKAGE (WP) NO: N/A

TASK NUMBER: Task 3.1

PI NAME: Prof. Elena Rostova

CO-PI NAME: Dr. Marcus Vance

2. CORE REPORT CONTENT

APPROVED OBJECTIVES:

Train collision avoidance models in high-density simulated urban environments.

METHODOLOGY:

Deployed Proximal Policy Optimization (PPO) agents within a simulated Unity environment using synthetic LiDAR inputs.

SUMMARY PROGRESS:

Agents have achieved a 94% success rate in avoiding dynamic obstacles. Currently working on physical deployment validation protocols.

3. CAPACITY BUILDING & PUBLICATIONS

3.1 Publications Submitted / Published

No publication details added yet.

3.2 Workshops / Conferences Conducted

No workshops or conferences recorded yet.

3.3 Training Programs Conducted

No training programs recorded yet.

4. NUMBER OF INTERNS TRAINED

Total Interns / Students Trained: 0
